Asian American Health Initiative

Together To Build A Healthy Community

Sanjana Quasem, Program Manager II
Montgomery County DHHS

Chinese American Community Health Services

Overview

- AAHI Introduction
- Latest COVID-19 Trends
- MCDHHS COVID-19 Resources
- Upcoming County Vaccination Clinics

AAHI's Mission

To improve the health and wellness of Asian American communities in Montgomery County by applying equity, community engagement, and data-driven approaches.

AAHI Core Work Areas

Community Engagement
Conduct outreach to engage

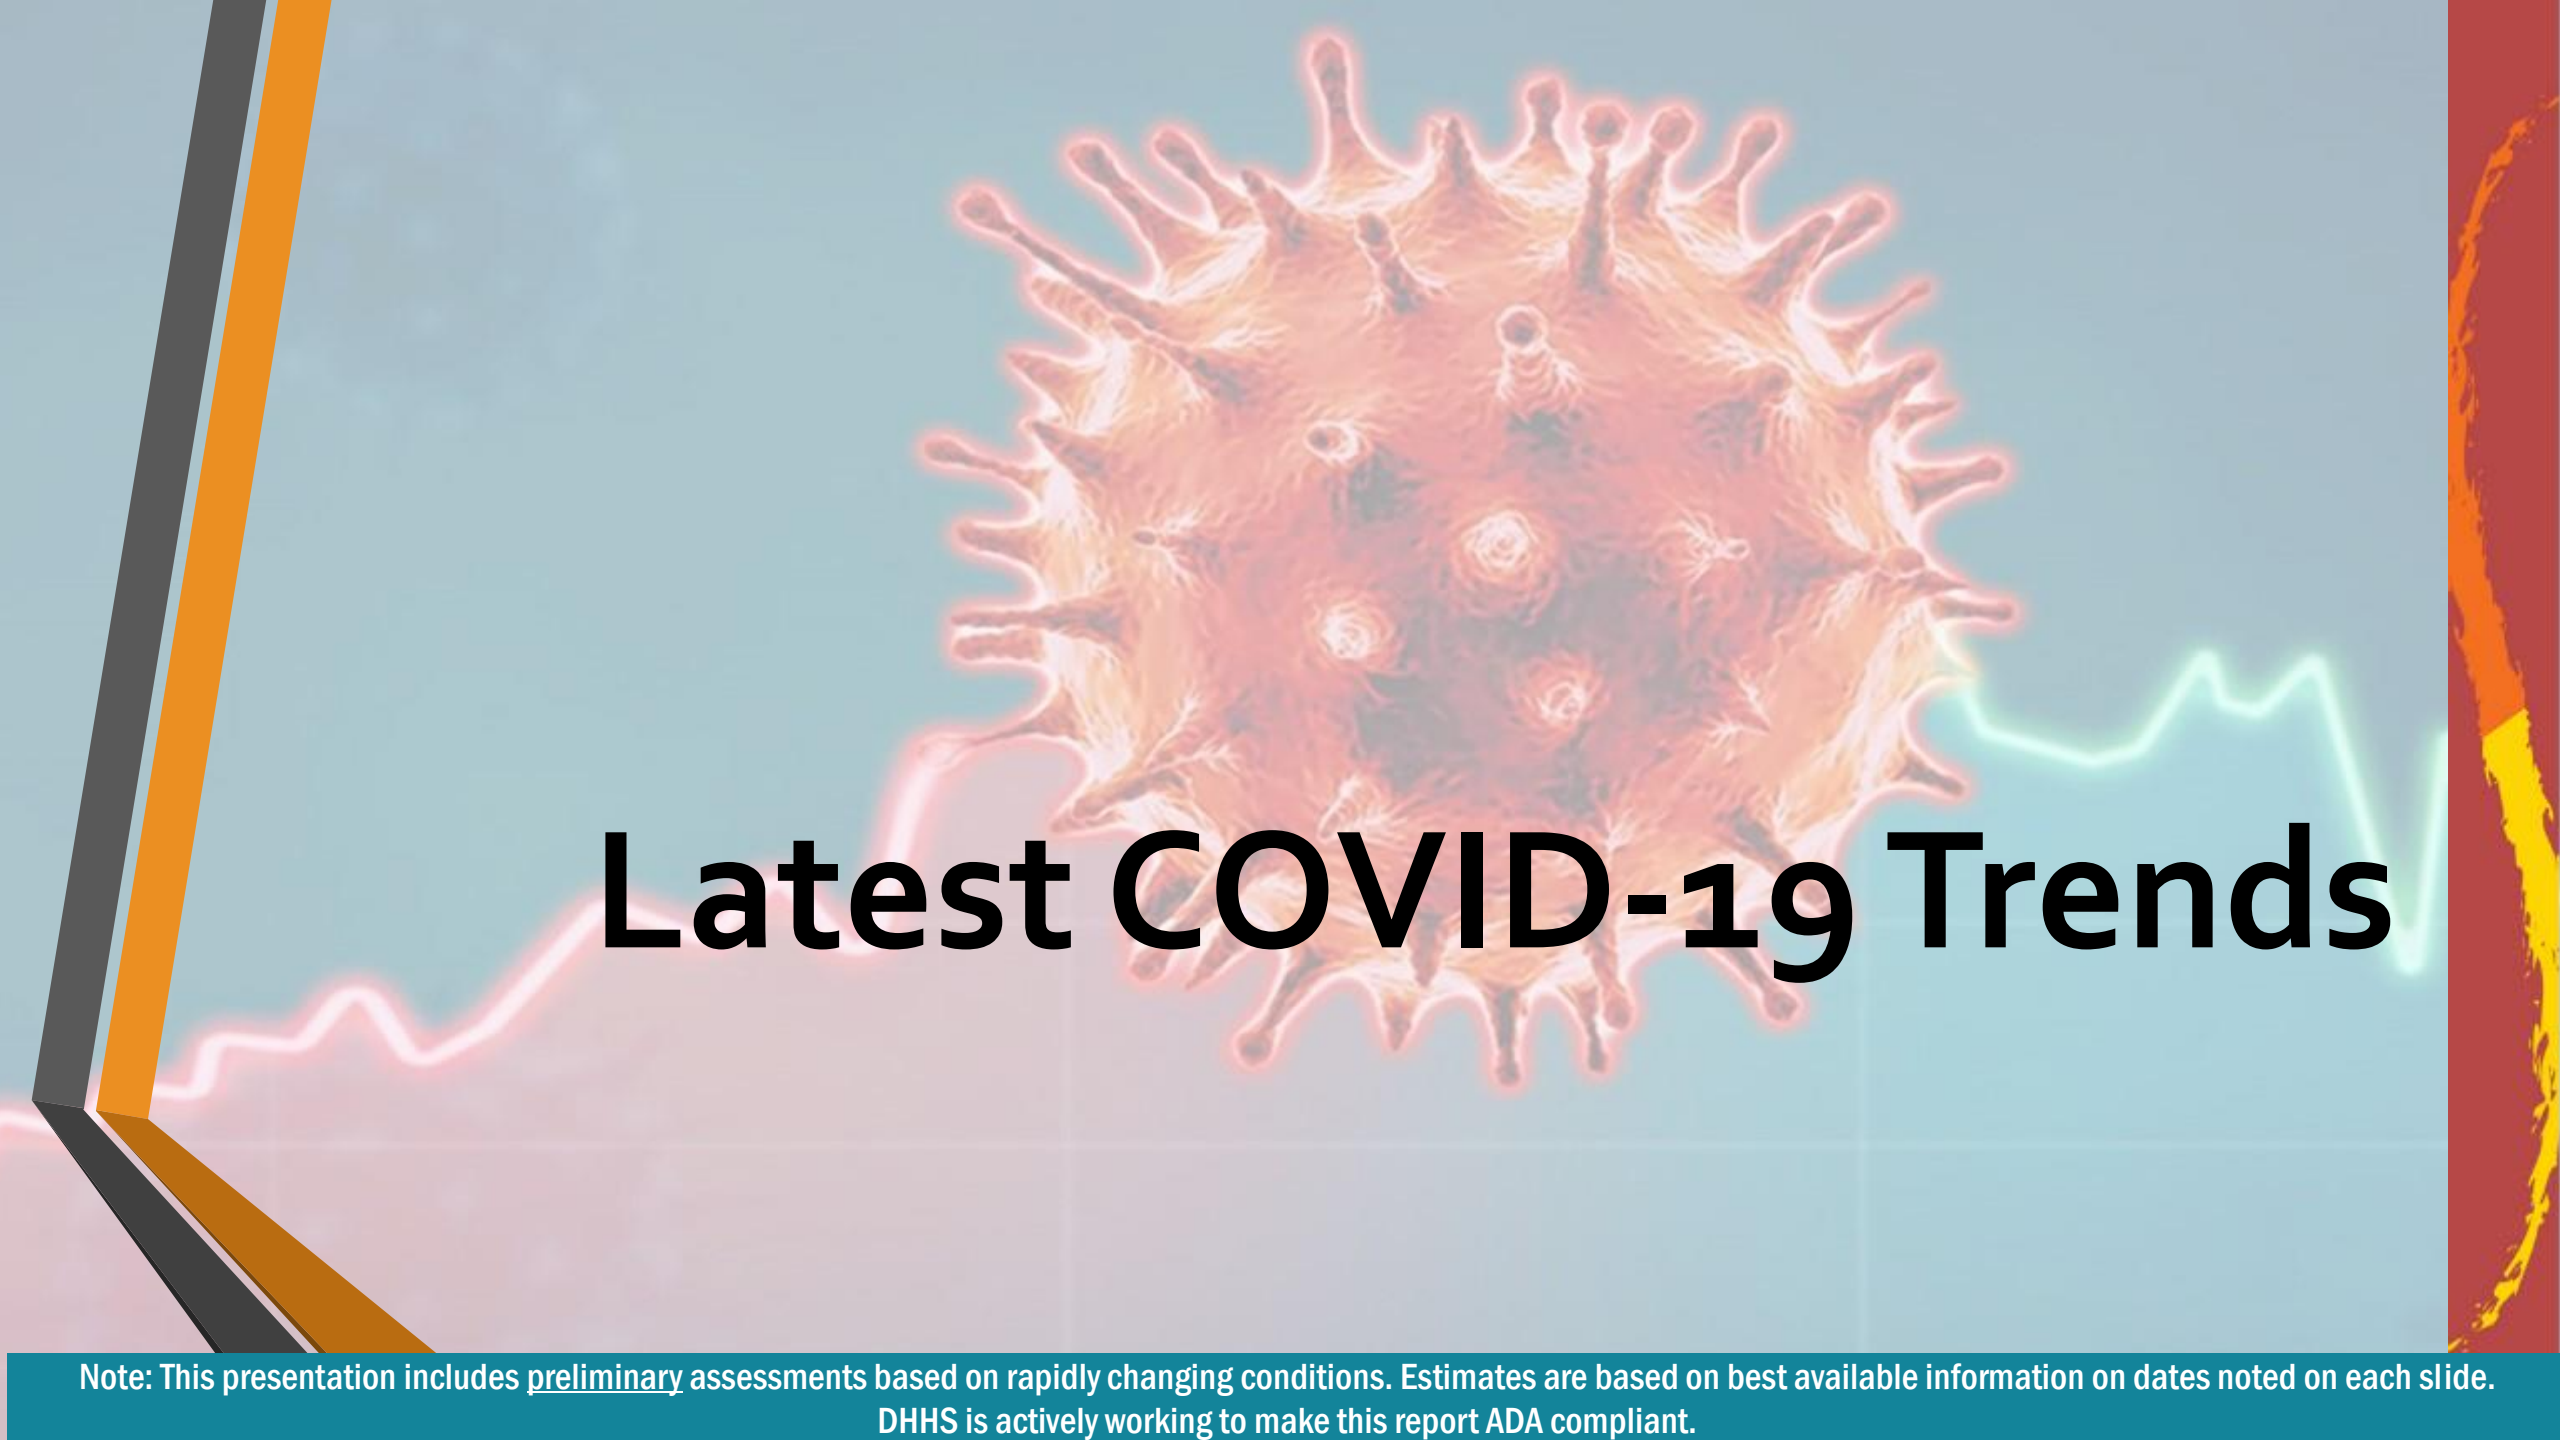
Community Empowerment
Provide technical assistance to empower

Capacity Building
Create models and tools to demonstrate promising practices

Change Catalyst
Influence changes to improve systems

What can AAHI do for you?

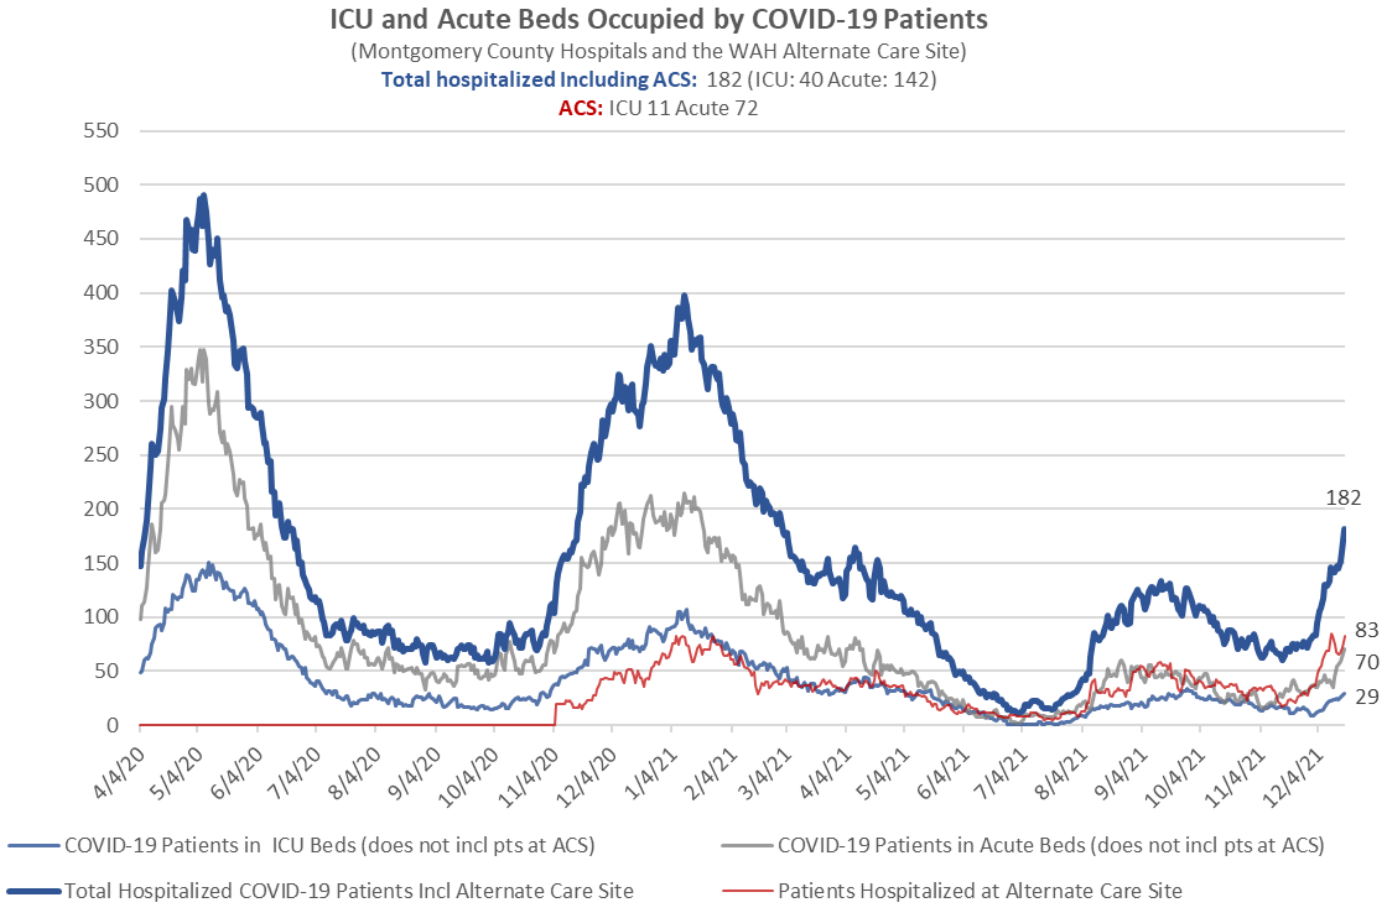
- Refer and connect you with needed health, social service, and mental health services
- Connect you with culturally competent mental health providers
- Train community members on finding and eligibility for county services (PREP Workshop)
- Mental Health First Aid Certification
- Request print copies of our health education materials

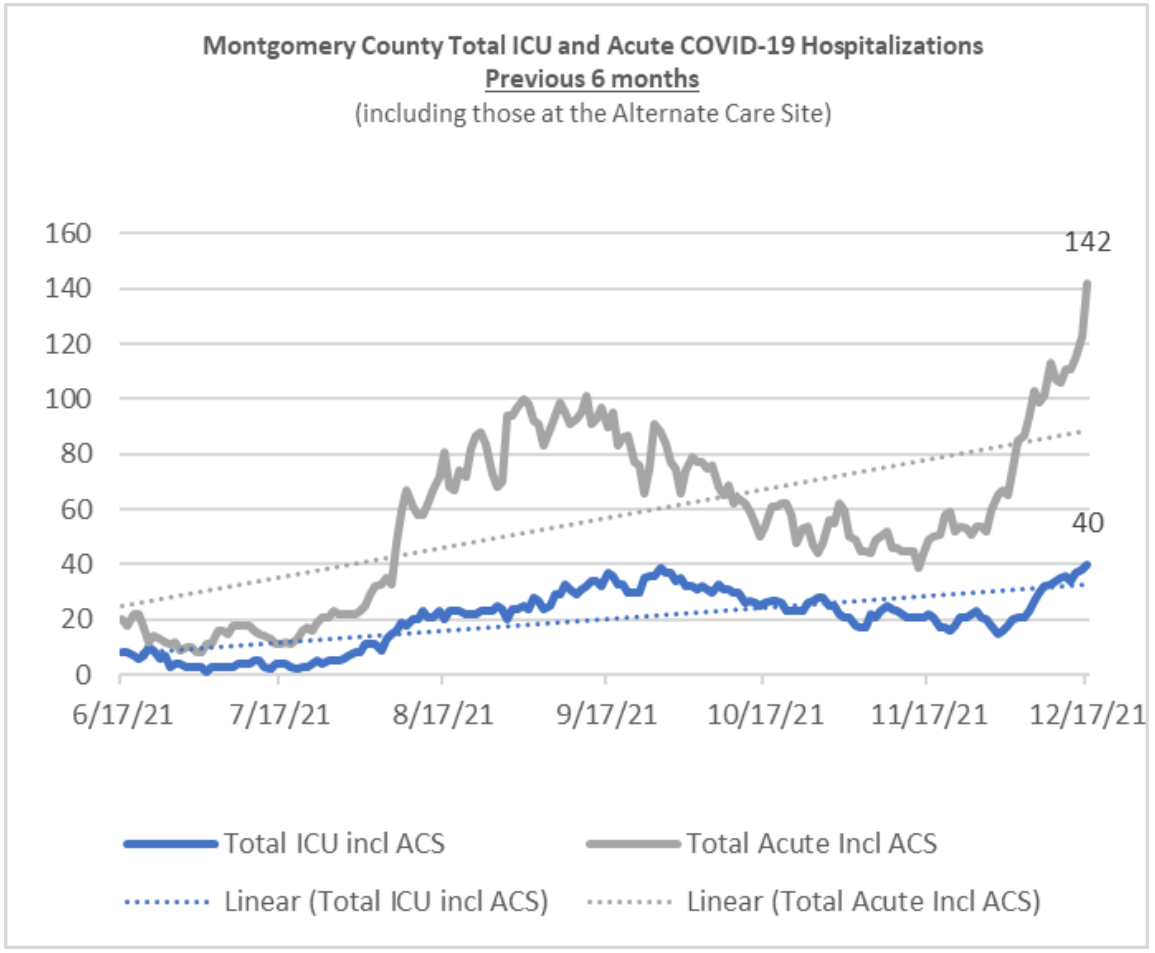


Latest COVID-19 Trends

Note: This presentation includes preliminary assessments based on rapidly changing conditions. Estimates are based on best available information on dates noted on each slide.
DHHS is actively working to make this report ADA compliant.

Montgomery County COVID-19 Hospitalization Rates





COVID-19 VACCINATION SUMMARY

As of 12.14.21, DHHS has limited access to information on COVID cases and vaccinations other than publicly available data due to the security incident at the Maryland Department of Health last week. Depicted below are vaccination data from the CDC, extracted on 12.14.21.

% OF ALL COUNTY RESIDENTS VACCINATED

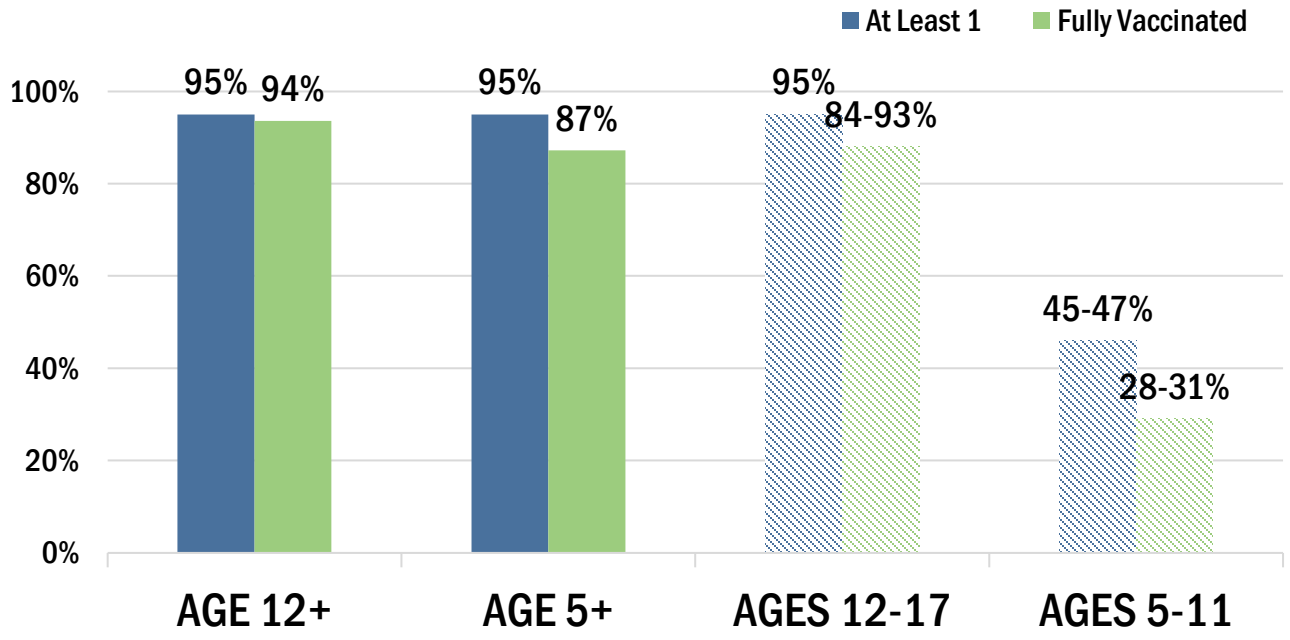
AT LEAST 1 DOSE	FULLY VACCINATED
95% OF TOTAL POPULATION	82% OF TOTAL POPULATION
1,001,131	864,377

Data points above posted on CDC site on 12.17.21

- Montgomery County continues to rank #1 nationwide for % of 12+ population fully vaccinated among all US counties with >300K residents.
- The county ranks 7th among all US counties with >300K residents for % of 5+ population fully vaccinated.

% OF COUNTY RESIDENTS VACCINATED BY AGE

NOTE: The CDC now caps vaccination rates at 95%. Previously, these rates were capped at 99.9%. The modified cap accounts for data entry errors and margins of error associated with census population data.



The percentages of 12-17 year olds and 5-11 year olds vaccinated are reported as 90% confidence range because of higher margin of errors within these age groups. According to the CDC, as of 12.14.21, 85,937 12-17 year olds received at least 1 dose, and 75,881 received a complete series. Among 5-11 year olds, 42,944 received at least one dose, and 25,219 received a complete series.
